Request for Waiver of Section 11.11(a) of the	)	
Commission's Rules	)	

**ORDER**

**Adopted: February 25, 2003****Released: March 3, 2003**

By the Chief, Technical and Public Safety Division, Enforcement Bureau:

1. In this *Order*, we grant CCS, LLC d/b/a Community Cable Service ("CCS") temporary waivers of Section 11.11(a) of the Commission's Rules ("Rules") for the nine above-captioned cable television systems. Specifically, we grant a six-month waiver for one cable system in Liberty Lake, Washington and 36-month waivers for the eight other captioned cable systems. Section 11.11(a) requires cable systems serving fewer than 5,000 subscribers from a headend to either provide national level Emergency Alert System ("EAS") messages on all programmed channels or install EAS equipment and provide a video interrupt and audio alert on all programmed channels and EAS audio and video messages on at least one programmed channel by October 1, 2002.<sup>1</sup>

2. The Cable Act of 1992 added new Section 624(g) to the Communications Act of 1934 ("Act"), which requires that cable systems be capable of providing EAS alerts to their subscribers.<sup>2</sup> In

---

<sup>1</sup> 47 C.F.R. § 11.11(a).

<sup>2</sup> Cable Television Consumer Protection and Competition Act of 1992, Pub. L. No. 102-385, § 16(b), 106 Stat. 1460, 1490 (1992). Section 624(g) provides that "each cable operator shall comply with such standards as the Commission shall prescribe to ensure that viewers of video programming on cable systems are afforded the same emergency information as is afforded by the emergency broadcasting system pursuant to Commission regulations ...." 47 U.S.C. § 544(g).

1994, the Commission adopted rules requiring cable systems to participate in EAS.<sup>3</sup> In 1997, the Commission amended the EAS rules to provide financial relief for small cable systems.<sup>4</sup> The Commission declined to exempt small cable systems from the EAS requirements, concluding that such an exemption would be inconsistent with the statutory mandate of Section 624(g).<sup>5</sup> However, the Commission extended the deadline for cable systems serving fewer than 10,000 subscribers to begin complying with the EAS rules to October 1, 2002, and provided cable systems serving fewer than 5,000 subscribers the option of either providing national level EAS messages on all programmed channels or installing EAS equipment and providing a video interrupt and audio alert on all programmed channels and EAS audio and video messages on at least one programmed channel.<sup>6</sup> In addition, the Commission stated that it would grant waivers of the EAS rules to small cable systems on a case-by-case basis upon a showing of financial hardship.<sup>7</sup> The Commission indicated that waiver requests must contain at least the following information: (1) justification for the waiver, with reference to the particular rule sections for which a waiver is sought; (2) information about the financial status of the requesting entity, such as a balance sheet and income statement for the two previous years (audited, if possible); (3) the number of other entities that serve the requesting entity's coverage area and that have or are expected to install EAS equipment; and (4) the likelihood (such as proximity or frequency) of hazardous risks to the requesting entity's audience.<sup>8</sup>

3. CCS filed a request for temporary, six-month and 36-month waivers of Section 11.11(a) for the nine captioned cable systems on September 27, 2002. In support of its waiver request, CCS states that these are small, rural cable systems. CCS further states that the Liberty Lake, Washington system serves 1,496 subscribers and the Connell, Ione, Kahlotus, Lind, Odessa, Ritzville, Tekoa and Warden, Washington systems serve between 22 and 518 subscribers. Additionally, CCS notes that EAS equipment for its Liberty Lake system is on backorder and will be installed upon delivery. Based on the \$7,000 manufacturer price to install EAS equipment at Liberty Lake, CCS estimates that it would cost approximately \$56,000 to install EAS equipment at the remaining eight cable systems for a total cost of \$63,000. CCS asserts that this cost will impose a substantial financial hardship on it and provides its financial statements for 2000, 2001 and 2002 in support of this assertion. In addition, CCS submits that its subscribers will continue to have ready access to national EAS information from other sources, including its cable systems. In this regard, CCS notes that its subscribers currently have access to national EAS messages on at least 28 percent of all programmed channels. CCS further submits that its subscribers will have access to EAS information through over-the-air reception of broadcast television and radio stations.

<sup>3</sup> *Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, Report and Order and Further Notice of Proposed Rule Making*, FO Docket Nos. 91-171/91-301, 10 FCC Rcd 1786 (1994) ("First Report and Order"), reconsideration granted in part, denied in part, 10 FCC Rcd 11494 (1995).

<sup>4</sup> *Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, Second Report and Order*, FO Docket Nos. 91-171/91-301, 12 FCC Rcd 15503 (1997) ("Second Report and Order").

<sup>5</sup> *Id.* at 15512-13.

<sup>6</sup> *Id.* at 15516-15518.

<sup>7</sup> *Id.* at 15513.

<sup>8</sup> *Id.* at 15513, n. 59.

4. Based upon our review of the financial data and other information submitted by CCS, we conclude that a temporary, six-month waiver of Section 11.11(a) for the Liberty Lake, Washington cable system is warranted, and temporary, 36-month waivers of Section 11.11(a) for the eight other captioned cable systems are warranted.<sup>9</sup> In particular, we find that the \$63,000 cost of EAS equipment for these small cable systems could impose a financial hardship on CCS.

5. We note that the Commission recently amended the EAS rules to permit cable systems serving fewer than 5,000 subscribers to install FCC-certified decoder-only units, rather than both encoders and decoders, if such a device becomes available.<sup>10</sup> Based on comments from equipment manufacturers, we anticipate that such a decoder-only system could result in significant cost savings to small cable systems.<sup>11</sup>

6. Accordingly, **IT IS ORDERED** that, pursuant to Sections 0.111, 0.204(b) and 0.311 of the Rules,<sup>12</sup> CCS, LLC d/b/a Community Cable Service **IS GRANTED** a waiver of Section 11.11(a) of the Rules until April 1, 2003 for the cable television system in Liberty Lake, Washington and **IS GRANTED** a waiver of Section 11.11(a) of the Rules until October 1, 2005 for the cable television systems in the Connell, Washington; Ione, Washington; Kahlotus, Washington; Lind, Washington; Odessa, Washington; Ritzville, Washington; Tekoa, Washington, and Warden, Washington.

7. **IT IS FURTHER ORDERED** that CCS, LLC d/b/a Community Cable Service place a copy of this waiver in its system files.

8. **IT IS FURTHER ORDERED** that a copy of this *Order* shall be sent by Certified Mail Return Receipt Requested to counsel for CCS, LLC d/b/a Community Cable Service Christopher C. Cinnamon, Esq., Cinnamon Mueller, 307 North Michigan Avenue, Suite 1020, Chicago, Illinois 60601.
